

PARROTS

1. What are for four (4) most common colors found on parrots?
2. About how many different species of parrots exist? Name two (2).
3. What do parrots eat?
4. How are parrots able to fly?
5. List two characteristics or uses of a parrot's foot
6. Describe what a parrot's egg look like.
7. How are parrots able to talk?
8. Draw and color a parrot or make a parrot craft.

HELP:

1. Bright red, green, yellow, and blue
2. Over 300 - answers will vary
3. Fruits, seeds, and nuts
4. Bones are hollow, making their body light. Flap their wings very fast
5. The foot has a strong grip, has four long toes on each foot - two pointed forward and two pointed backward, can grip a branch so tightly they can hang upside down, can stand on one foot and eat from the other, can cause their toes to pick things up like we do with our hands and fingers.
6. All white, like a chicken egg. Parrots can mimic noises they hear: voices, phones ringing, sirens, etc. They do not make up phrases or learn how to answer questions.
